

# EARN A SUBSTANTIAL PREMIUM WITH VITERRA

With **Clearfield** canola you have the opportunity to receive health bonuses and Non-GMO premiums for growing any of these **Clearfield** varieties. In addition, you are supporting a new and emerging market around the world for expeller-pressed canola oil. Sign a non-GMO production contract to increase profit.

## GET THE CLEARFIELD ADVANTAGE WITH VITERRA

Consistent performers over a wide range of conditions and suited for all growing zones, Proven® VR 9560 CL and XCEED® Hybrid X121 CL from Crop Production Services Canada, and Pioneer® brand canola hybrids 46H75 and NEW 45H76 are excellent choices for **Clearfield** canola acres. With strong resistance to blackleg and fusarium wilt, these varieties bring in higher yields and more profit for Western Canadian Growers.

## ABOUT EXPELLER-PRESSED CANOLA

The global demand for expeller-pressed oil is increasing, particularly in the natural food segment. Through our relationships with Western Canadian farmers we are able to produce canola oil using an all-natural double expeller-pressed process. Our canola crush plant in Ste. Agathe, Manitoba specializes in crushing Non-GMO **Clearfield** canola.

If you have any questions or would like more information regarding Viterra's Non-GMO **Clearfield** canola program please contact your local Viterra sales representative.

Find out more about the benefits of expeller-pressed canola oil by visiting [viterra.com/canolaoil](http://viterra.com/canolaoil).
